

Workshop

“Management of mountain watersheds in a climate change perspective: from the Alps to the Mediterranean areas”

Thursday 28th September 2023

Free University of Bolzano-Bozen, Italy
and online

The management of mountain watershed represents a very important topic in this period in which the effects of ongoing climate change have shown all their destructive force. The management of mountain areas, both in the Alps and in the Mediterranean area, must accept the challenge launched by climate change by proposing solutions and actions that combine development and sustainability, preserving the future of human communities while respecting and protecting the territory.
